

ATRACC Symposium: 6 to 8 November, 2025

The Association for the Advancement of Artificial Intelligence is pleased to present the 2025 Fall Symposium Series, to be held Thursday-Saturday, November 6-8 at Westin Arlington Gateway, Arlington, Virginia. The Fall Symposium Series is an annual set of meetings run in parallel at a common site. It is designed to bring colleagues together in an intimate forum while at the same time providing a significant gathering point for the AI community. The two and one-half day format of the series allows participants to devote considerably more time to feedback and discussion than typical one-day workshops. It is an ideal venue for bringing together new communities in emerging fields.

The program will host eight symposia, including:

- AI for Social Good: Emerging Methods, Measures, Data, and Ethics
- **AI Trustworthiness and Risk Assessment for Challenged Contexts (ATRACC)**
- First AAAI Symposium on Quantum Information & Machine Learning (QIML): Bridging Quantum Computing and Artificial Intelligence
- Unifying Representations for Robot Application Development
